Function (x, y, v_x, v_y) :

- Compute value of r
- Compute values of a_x and a_y
- Calculate new " v_x " and " v_y "
 - $v_{x\text{new}} = v_x + a_x \Delta t$
 - $v_{y\text{new}} = v_y + a_y \Delta t$
- Repeat with $v_{x\text{new}}$ and $v_{y\text{new}}$
